## Machine Learning (2019, Spring) - HW1

# Homework 1 - PM2.5 Prediction

#### **Announcements**

#### 3/6

• HW1 Virtual Environment release 🚣

#### 3/1

- Sample code release 🗐
- Public Strong Baseline release!

#### 2/22

- 新增hw1 best.sh套件限制:
  - Tensorflow == 1.12.0
  - Pytorch == 1.0.1
  - Keras == 2.2.4
  - Scikit-learn == 0.20.2

#### 2/21

- HW1 release!
- 手把手 release!

### **Deadlines**

- Simple Bonus Deadline: 02/28/2019 23:59:59 (GMT+8)
- Kaggle Deadline: 03/07/2019 11:59:59 (GMT+8)

Github Deadline: 03/08/2019 23:59:59 (GMT+8)

### **Assignment Regulation**

- ALL code must be written in python3.6
- For hw1.sh:
  - ALL python standard library is permitted (e.g. sys, csv, time)
  - numpy >= 1.14
  - scipy == 1.2.1
  - pandas == 0.24.1
- FOr hw1\_best.sh:
  - o Meet the higher score you choose in kaggle
  - ALL toolkit is permitted (however with some version limitation)
  - Tensorflow == 1.12.0
  - Pytorch == 1.0.1
  - Keras == 2.2.4
  - Scikit-learn == 0.20.2

### **FAQ**

Q1:請問kaggle的組隊人數上限?

A1:hw1為個人作業,不用在kaggle上進行組隊。

Q2: 如果只有實作 gradient descent·hw1.sh跟hw1\_best.sh可以繳交同一份script嗎?

A2: 可以的。

Q3: 請問report第一題到底要我們比較哪兩個模型?

A3:簡單來說是比較以下兩種模型:

- 9x18+1=163種feature (9小時內所有18種測量值+bias項)
- 9x1+1=10種feature (9小時內所有PM2.5值+bias項)

Q4: 所以hw1 best.sh可能會用到的套件也要寫信跟助教確認嗎?

A4:不用!只有hw1.sh中若會使用到numpy, scipy, pandas以外的套件才需要寫信。

Q5:hw1.sh 可以import sys 嗎?

A5:sys 屬於 python standard library,所以是可以使用的。其他可以使用的內建套間可以參照:python standard library。
